

Our strengths

Our **innovative spirit** and **willingness to listen, solve problems** and **create added value** for our customers has made Luvata Pori an undisputable market leader in many of the industries we serve.

Our diverse **knowledge of metals**, alloys, coatings, production processes and **lean principles** enables us to deliver the customised solution that's just right for you. We focus on copper's intrinsic characteristic of very high electrical conductivity, in combination with other alloys, to deliver enhanced physical or mechanical properties in new **product development**.

As a **vertically integrated** business, Luvata has total control of **quality and productivity** throughout the entire manufacturing process, delivering the highest quality products available on the market today. Our extensive list of capabilities includes **continuous casting, billet and continuous extruding, drawing, annealing**, and **machining** enabling us to deliver the optimal solution for niche applications.

Based on our extensive **metallurgical expertise** and exceptional **customer support**, our highly specialised products lie at the heart of influencing many of the high-growth industries of the modern world.

Luvata Pori Oy

Our markets

Automotive

Profiles
Hollow conductors
Rotor wedges

Electronics

Anodes for electroplating
High purity copper
OFE copper

Healthcare

Hollow conductors
Superconducting wires and cables

Metals and mining

Copper staves, cooling elements
Busbar systems
Tank house accessories, slag launders
Plate coolers and hanger bars

Power generation and distribution

Rotor bars, profiles
Stator and rotor tubes
Pole winding copper
Busbars and components

Renewable energy

Sunwire photovoltaic ribbon

Our products

Hollow conductors

OFE and standard products
